Before You Start

Maps Lead Scraper is a browser extension that works in Google Chrome and Microsoft Edge. It installs manually in about two minutes - no coding, no developer experience needed.

You will need:

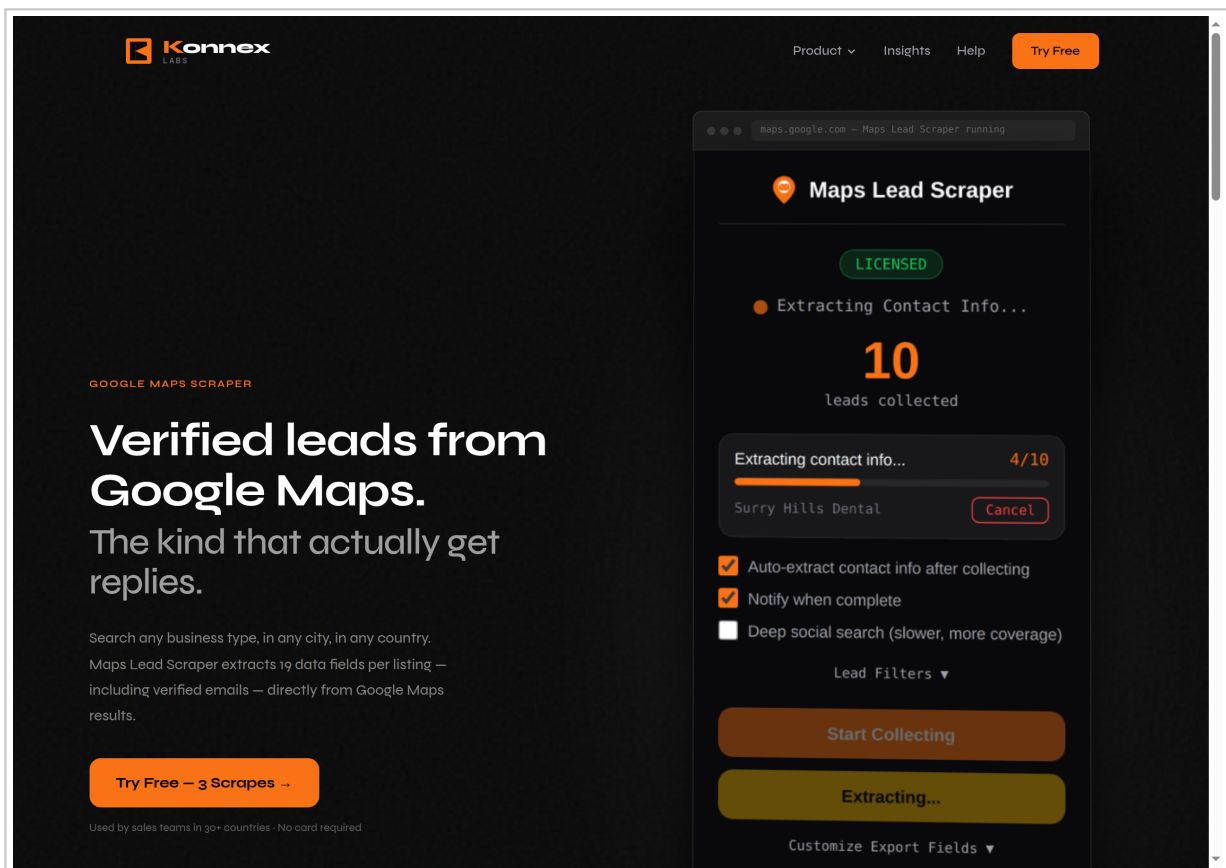

- > Google Chrome or Microsoft Edge (any recent version)
- > The Maps Lead Scraper .zip file from konnexlabs.com
- > About 2 minutes

Tip: These instructions show Chrome, but the steps are identical in Microsoft Edge.

Step 1

Download Maps Lead Scraper

Go to konnexlabs.com and click the download button to get the Maps Lead Scraper .zip file. Save it somewhere easy to find, like your Desktop or Downloads folder.

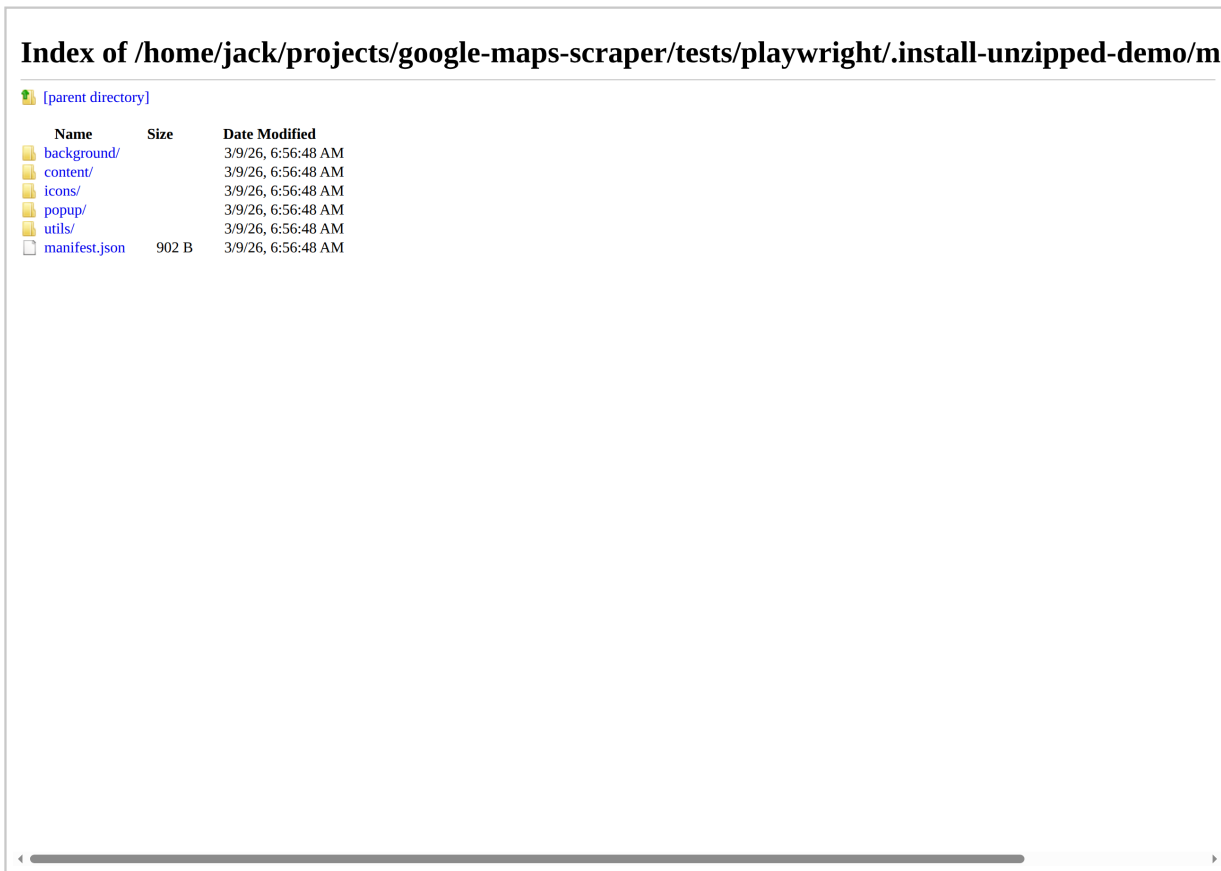

konnexlabs.com - click the download button

Step 2

Unzip the Downloaded File

Find the .zip file you just downloaded and unzip it. On Windows, right-click the file and select "Extract All." On Mac, double-click the file.

You should see a folder containing these files: background/, content/, icons/, popup/, utils/, and manifest.json. Do not rename or move any of these files.

The unzipped extension folder - do not modify these files

Important: Remember where this folder is. You will need to select it in Step 5.

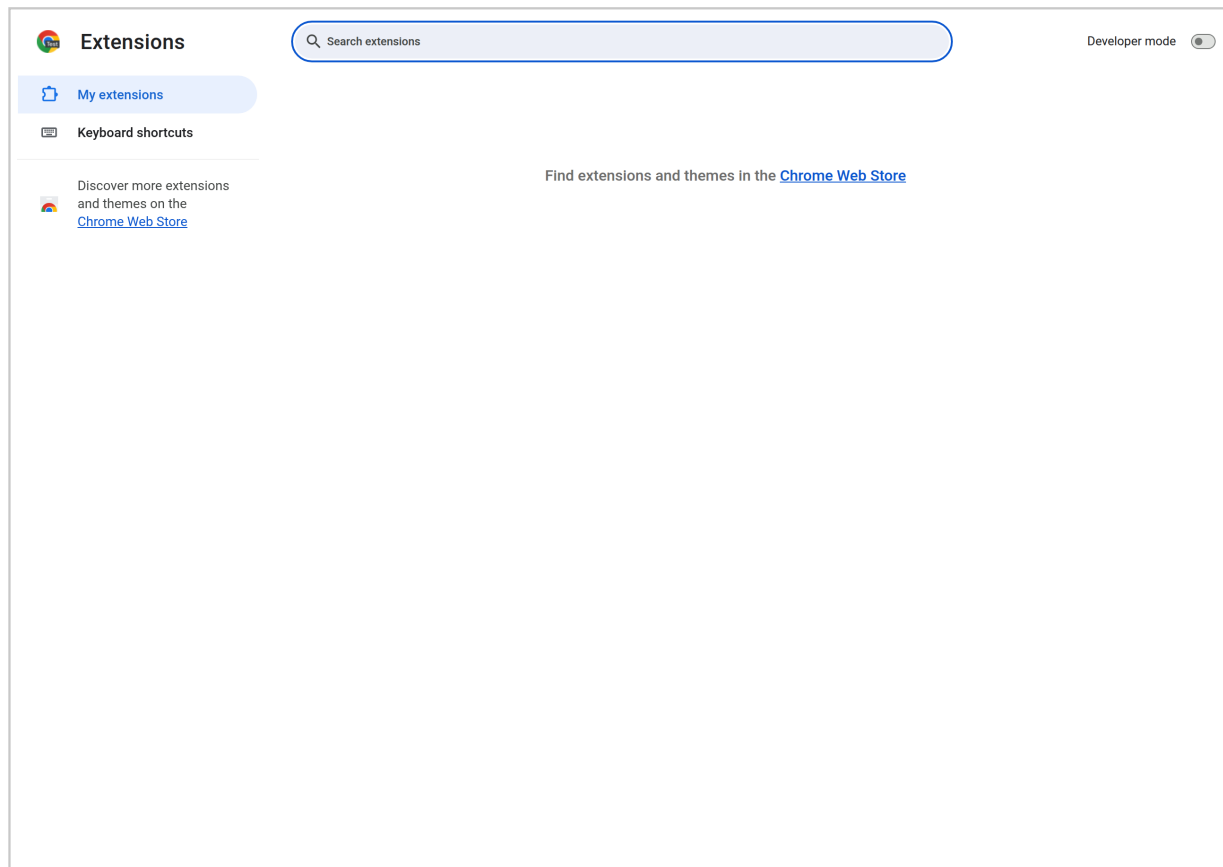

Step 3

Open the Extensions Page

Open Chrome and type `chrome://extensions` into the address bar, then press Enter.

In Microsoft Edge, type `edge://extensions` instead.

You will see the Extensions management page.

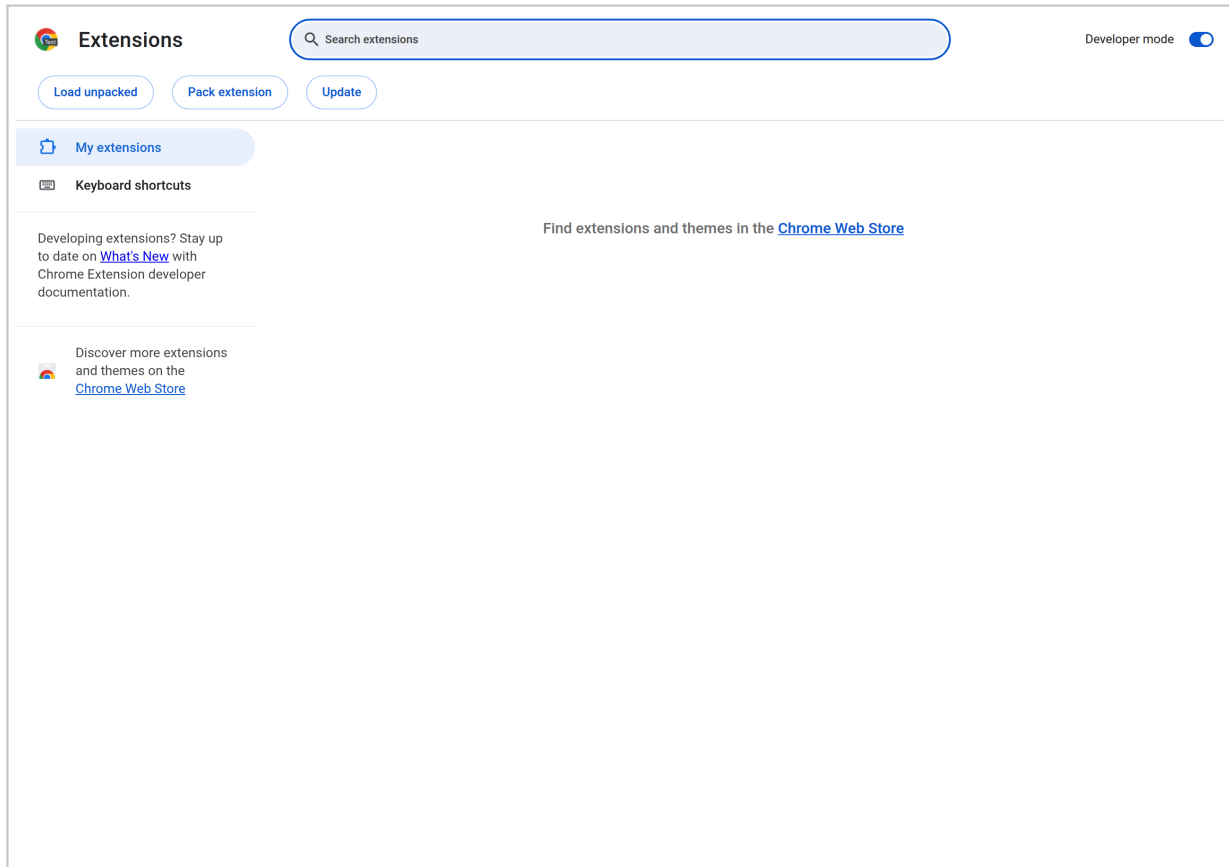

Chrome Extensions page - `chrome://extensions`

Step 4

Enable Developer Mode

Look at the top-right corner of the Extensions page. You will see a toggle switch labeled "Developer mode." Click it to turn it on.

Three new buttons will appear at the top of the page: "Load unpacked," "Pack extension," and "Update."

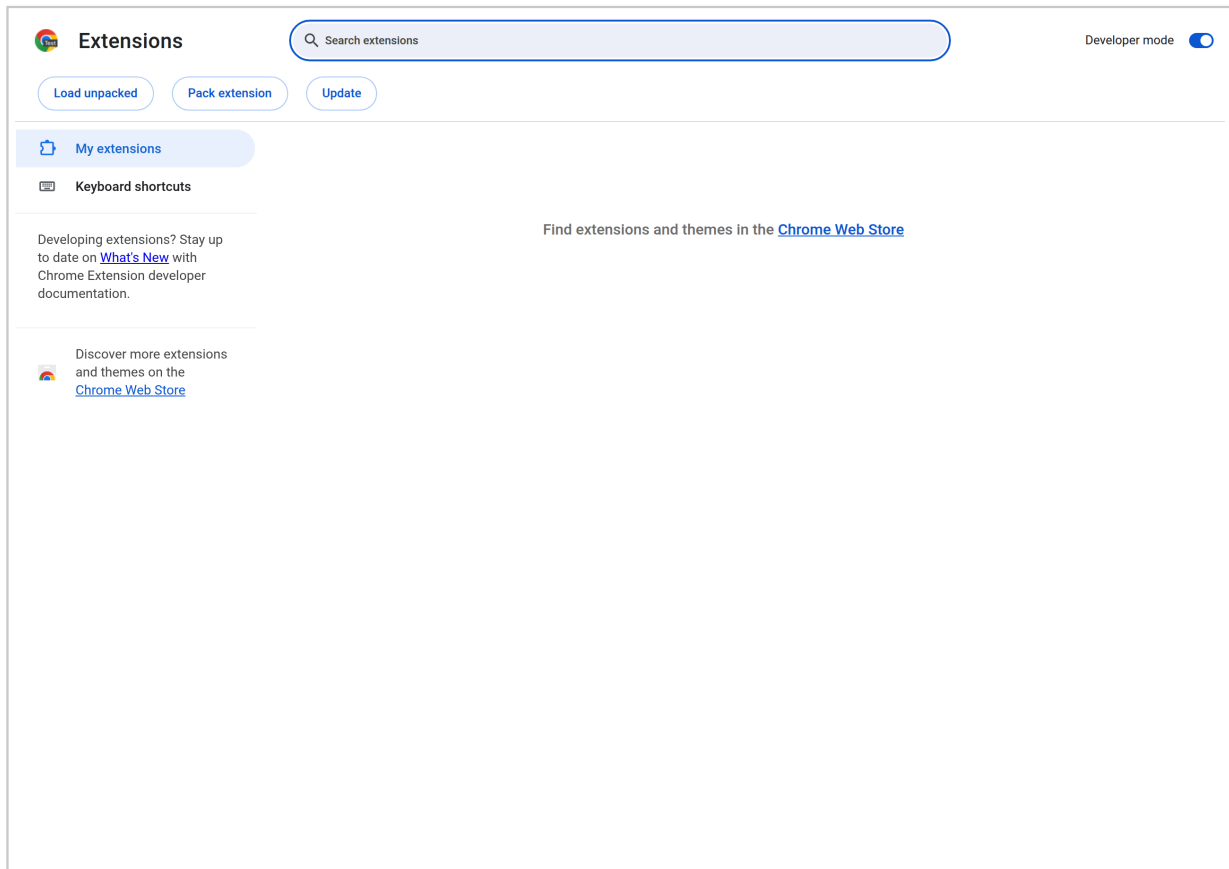

Developer mode toggled ON - three new buttons appear

Step 5

Click "Load Unpacked"

Click the "Load unpacked" button in the top-left area of the page.

Click the "Load unpacked" button

Step 6

Select the Extension Folder

A file picker window will open. Navigate to the folder you unzipped in Step 2 - the one containing manifest.json and the subfolders (background/, content/, icons/, etc.).

Select that folder and click "Select Folder" (Windows) or "Open" (Mac).

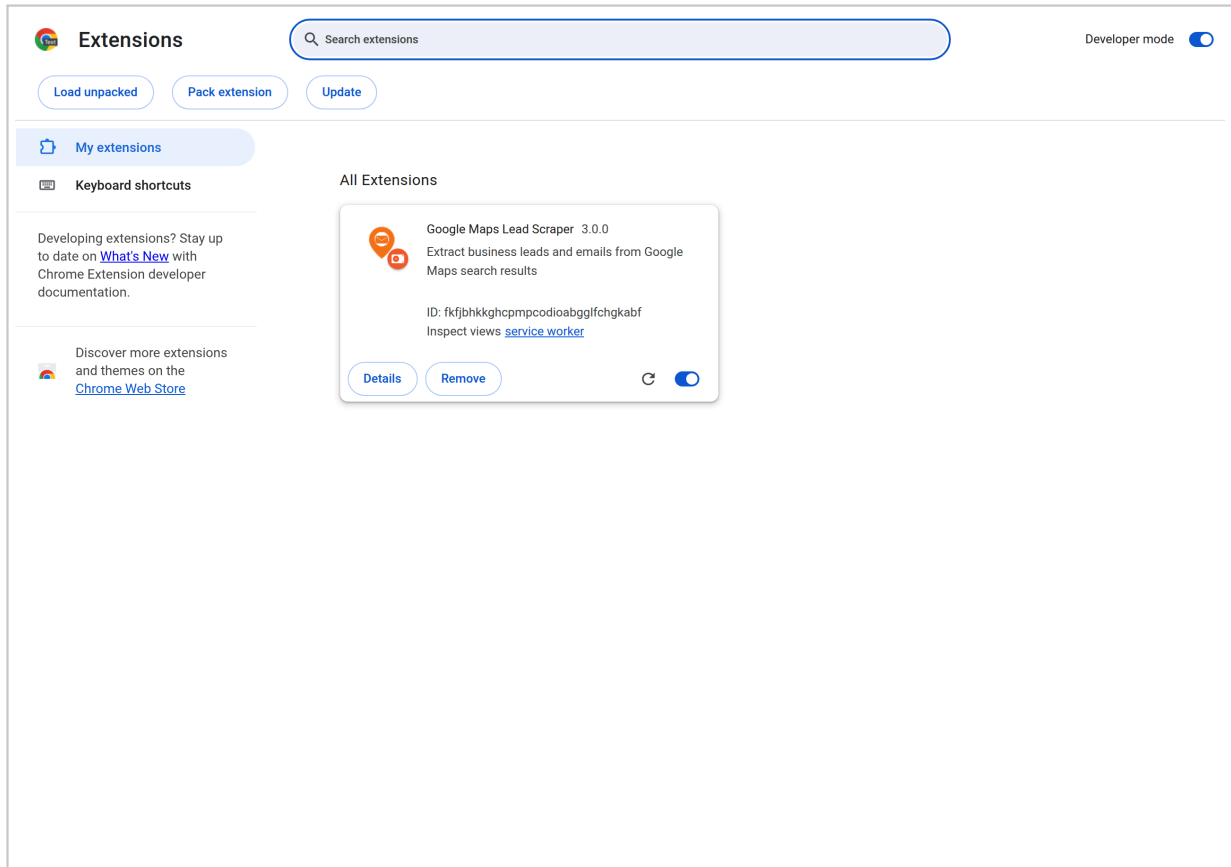

Make sure you select the folder that directly contains manifest.json, not a parent folder. If you see the subfolders listed, you are in the right place.

Step 7

Extension Installed!

Maps Lead Scraper will now appear in your extensions list. You should see the orange Maps Lead Scraper icon, the extension name, and version 3.0.0.

The toggle switch on the right should be turned ON (blue). If it is off, click it to enable the extension.

Maps Lead Scraper installed and enabled

Step 8

Pin the Extension to Your Toolbar (Recommended)

To access Maps Lead Scraper quickly, pin it to your browser toolbar:

1. Click the puzzle piece icon in Chrome's top-right toolbar area.
2. Find "Maps Lead Scraper" in the dropdown list.
3. Click the pin icon next to it.

The Maps Lead Scraper icon will now appear permanently in your toolbar for easy one-click access.

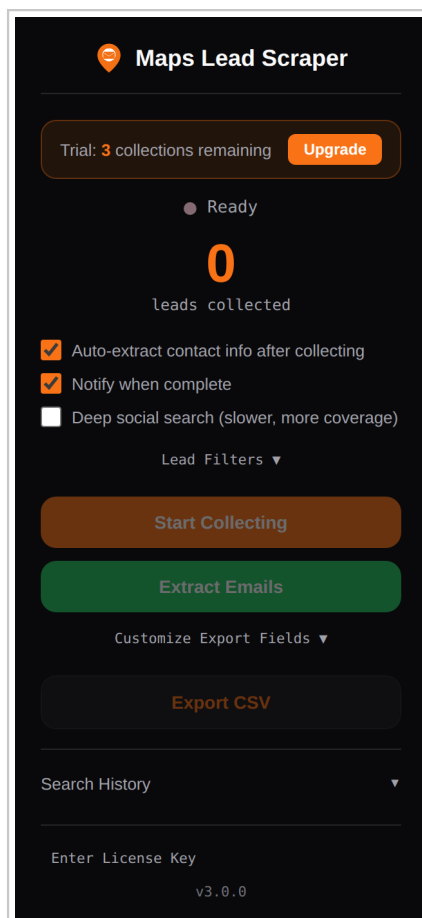

In Microsoft Edge, the steps are the same - click the puzzle piece icon and pin the extension.

Step 9

You're Ready! Start Scraping.

Open Google Maps (maps.google.com) or Bing Maps (bing.com/maps) and search for any business type in any city - for example, "plumber new york."

Click the Maps Lead Scraper icon in your toolbar. The extension panel will open. You are ready to start collecting leads.

The Maps Lead Scraper panel - ready to scrape

Quick Reference

1. Download the .zip from konnexlabs.com
2. Unzip the file
3. Open `chrome://extensions` (or `edge://extensions`)
4. Enable Developer mode
5. Click Load unpacked
6. Select the unzipped folder
7. Confirm extension appears in list
8. Pin to toolbar (optional)
9. Open Google Maps or Bing Maps and start scraping!
